

WBCA/SUMMERVILLE RPI

Pre Season Women's Basketball Strength of Schedule

Our calculations, of the strength of schedule, for division one women's basketball follows this page. We thought an explanation about how the rankings were calculated would be useful.

There are two rankings. The first rank is for non-conference games. The second is for the total schedule. It is interesting to see differences between the rankings of a given school. It is also amazing to see the consistency in the schedules of Tennessee.

The basic formula was to sum last seasons, division one, wins and losses of the teams appearing on the schedule of a given school. The RPI records were the source for these rankings. It sounds simple enough but there are a few variables to take into account.

1. Tournaments. When a school was appearing in a four-team tournament where there was a choice of two teams for the second game it was treated with both potential opponents records divided in half then added together. Since there is a 50-50 chance of a team playing either school it seemed fair to treat the records the same way. There is one eight-team tournament in Hawaii this season. When calculating the last potential opponent for a team, the four potential opponents had their record from last season divided into fourths. In some cases the total of a teams opponents wins or losses were rounded off.
2. Half games. There are four cases where the potential second opponent in a four-team tournament was a non-division one school. In those cases the potential division one opponent had their records cut in half and added to the teams total wins and losses. The other team was not included at all. When examining the rankings there is a column of the total non-conference division one games to be played this year. Those schools have only a half game registered.
3. Pre season WNIT. The first scheduled game to be played by a school in the WNIT is calculated but the potential following games were not. The reason is that it's an elimination tournament. It didn't seem fair to help a teams ranking with games that they may never play.
4. New division one schools. These are the schools that were not counted in the RPI last season. To give some weight to these teams their record versus division one schools from last season were included.

So if you look up the records of the teams on your favorite schools schedule, add them up on your own and they don't quite match the records produced here, one of the reasons above might be responsible for the difference.

Looking forward to the RPI this year.
Richie Summerville
