

NCAA staff has received several questions regarding which events women's basketball coaches may attend outside of permissible contact and evaluation periods. To determine if a coach may evaluate at an event outside of a permissible contact and evaluation period, apply the following analysis:

1. Does the national governing body consider the event a tryout or training event (e.g., training camps, mini-camps, tryouts, competition) in order for an individual to make the national team? [NCAA Bylaw 13.1.7.6.6]

If yes, coaches may attend the event outside of a permissible contact and evaluation period.

Please note: For the purposes of Bylaw 13.1.7.6.6, competition refers to intra-squad competition at a tryout or training event or competition against outside teams that the national governing body has officially designated as a tryout or training event. Generally, competition at events where the national team roster has already been determined would not be considered training or tryouts (e.g., FIBA 3X3 World Cup).

2. Is it an Olympic, Pan American, World Championships, World Cup, World University Games (Universiade) or World University Championship competition or the junior level equivalent competition (e.g., Youth Olympic Games)? [Bylaw 13.1.7.15]

If yes, coaches may attend the event outside of a permissible contact and evaluation period.

Please note: Other elite and international events not explicitly mentioned above (e.g., U18 European Championships) do not qualify.

The following chart, which includes past and future events, has been updated to assist the membership in its ongoing evaluation of events. Additionally, the highlighted event has been added to provide additional clarification to the membership.
