## Trends in the Proportion of Women's Basketball Transfers in Division I APR Cohorts

Notes: Percentages based on the 2019 APR data (released in May 2020).

# Changes in the Number of Division I Graduate Transfers 

## Summary

- The percent of student-athletes competing as postgraduates continues to increase ( $2.0 \%$ in $2014,3.1 \%$ in 2019). This includes those pursuing second undergraduate majors/degrees, general undergraduate coursework, or graduate degrees-either at the same institution or as graduate transfers.
- The number of graduate transfers in both men's and women's sports has more than doubled in the last five years.
- However, the number of graduate transfers remains low relative to the total number of participants in Division I sports. There were 706 graduate transfers identified in the 2019 Division I APR cohort out of nearly 113,000 Division I student-athletes (0.6\%).
- Graduate transfers are most prevalent in men's basketball ( $2.7 \%$ of the cohort were graduate transfers), football, women's basketball and men's and women's track and field.
