JD Gravina

Western Illinois University

## Learn

How to look deeper into statistics to find meaningful information that can help win games.

## Discover

How to recognize deceptive statistics and how the numbers relate to each other.

## Share

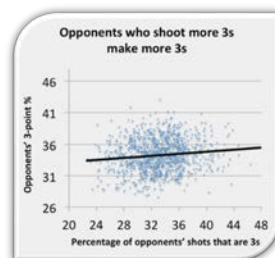

Tricks of the trade to help you learn what other successful teams are doing and how they are doing it.

## Harness the power of analytics to win games!

The amount of statistical information available has increased exponentially recently- what have you done as a coach to take advantage of this new information?

The statistical information coaches have access to today can be overwhelming and often misunderstood. Come learn simple and meaningful ways to turn those numbers into a learning tool for players and coaches. JD Gravina, Head coach at Western Illinois University, will apply knowledge and techniques he learned while earning a degree in Math and working as an actuary, to the wealth of information Synergy and other statistical services provide.

Coach Gravina will present results from his own regression analysis and advanced analytics studies ran with statistical information from all teams at all levels. You will dig deeper into not only the numbers, but also how the numbers relate to each other as well as to wins and losses. You will also learn tricks and tips to help you find out what successful teams are doing and how they are doing it.

## JD Gravina Western Illinois

Coach JD Gravina brings a wealth of knowledge to the field of sports analytics. His educational background includes a bachelor's degree in Math and Computer Science, and a Master's degree in Economics. He also worked professionally as an insurance actuary.

Coach Gravina's understanding of statistics has helped him grow from a high school basketball coach to a NCAA DI Head Coach in just 8 years. His teams have consistently been a top scoring team nationally.
